

The social skills transformational workshop basic

Social skills have always been an important part of society. In today's rapidly globalizing scenario, its importance cannot be over-emphasised. Social skills are not only an important ingredient of leadership but also work in tandem with one's knowledge to build a confident personality. Whether it is social conversation, public speaking, etiquette, planning a party, cooking or an exposure to interesting historical events, books one must read and socially fermenting issues or an introduction to leadership and organizational concepts, this will be an interesting time for people in the age group 15 to 22. Add to this the fact that they will have plenty of time to use the wonderful recreational facilities like indoor badminton, table-tennis, pool, billiards, chess, bridge and of course, the large, lap pool, this can even be a holiday masquerading as a workshop.
